GENERAL ORDER No. 1

TO THE PEOPLE OF WISCONSIN.

The best bought, best selected, best assorted and most extensive stock of

DRY GOODS

ever offered in Janesville, is now open to

PUBLIC INSPECTION

at the

Great Mart of McKey & Bro.

WE have taken advantage of the recent unparal- leled fall in the price of gold, to stock our Mart with

readed almost exclusively in New York for the past three months, we on hand and

BOUGHT LARGELY

of first class importers, who, under the influence of the

panic,

Sacrificed Many Desirable Goods

at 50 cents on the dollar of the prices ruling one week

previously. The public is aware that the cause of the

great advance in the price of Imported Goods was the

enormous premium on gold, to buy exchange and

pay duties; that having declined from 74 to 88 per

cent, or about 50 per cent on former rates, and we have

lying down at the spot which we took place, want in for

Files of Goods,

the purchase of one of which would double up the an- nual resources of many of the so-called Merchants who

flow, Hurrah and Clap their hands before the public.

But we believe that sensation advertisements are

played out, and that it is scarcely necessary to inform

the public that those who are compelled to buy goods

cheap, and live as it were from hand to mouth

cannot prosper.

COMPETE WITH US!

In proof of which we offer the following:

200 yd full yd wide New York & Shetland, 30c per yd.

Forever float that standard sheet—
Where breathes the foe but falls before us;
With Freedom's soil beneath our feet,
And Freedom's banner streaming over us!

The News.

There is considerable doubt about the intentions of the enemy on the Potomac. They have retired from Pennsylvania, for the present, with what booty they could gather. A portion of Lee's army is in the neighborhood of Williamsport, and it is thought they intend crossing the Potomac near that point or at Nolan's Ferry, where they would naturally occupy their old ground near Antietam. The other part of Lee's forces are said to be at Front Royal. It is not likely they have given up their expedition, but will either cross the Potomac and invade Maryland and Pennsylvania, or if Hooker leaves Washington unprotected, advance upon the capital.

There is nothing important from Vicksburg. We may expect the fall of that rebel stronghold in a few days.

From Milwaukee's Bend.

The following is an extract from a private letter written by Dr. Whiting, of this city, to his family, June 10th. The Doctor has charge of the general hospital at Milwaukee's Bend, on the Mississippi, above Vicksburg:

Before this reaches you you will have heard of the raid here, and you will of course fear for my safety. My hospital has been left nearly unprotected for the last few weeks, and I have expected that we should be "gobbled," for we seemed almost to invite a raid. We had almost two thousand men here in hospital, whom they could take and "exchange" for an equal number of their fighting men whom we hold as prisoners. Besides, I have in my possession more than a hundred thousand dollars worth of property which they need.

Last Saturday noon a negro came dashing to my quarters, on a mule, saying that the secess were coming. At the time, I supposed it was only a scare. I very soon saw that the negroes believed it, for they came in swarms down to my hospital and passed on to the timber beyond. These were mostly women and children. Three miles above me a negro brigade had been organizing for a few weeks. On these the fury of the enemy was spent until driven back by the gunboats. The enemy consisted of about 1600 Texan infantry, under McCullough, brother of the notorious "Ben." Our forces consisted of the negroes, (parts of four regiments,) the 23d Iowa, and a battalion of cavalry. It is said that the white men all run, and from what I saw I am inclined to think it may be true. The battle was nearly two miles up the river from my hospital, but in sight. It is said that the negroes fought well, but except for the gunboats they would undoubtedly have been utterly defeated. At one time the colonel of the 23d Iowa returned to the levee which bounds my hospital grounds, and preferred to take my chances rather than have him draw the enemy into a fight where they would necessarily fire directly into my camp. Nearly 100 of my boys went out and fell into line with the 23d Iowa, but the enemy did not come down. This happened on Saturday, but the fight did not occur until next day. My camp was of course greatly excited, and we came near being thrown into disorder. And more than a hundred negroes were brought to the contraband depot, next to my hospital, severely wounded. The white men were also brought in. Among them are five or six rebels. My hospital is very full. To night I have nearly two thousand men in it, but I have an order to send eight hundred to St. Louis to-morrow.

A MISTAKE.—Two correspondents in the Monitor use up nearly two columns of the valuable paper in commenting upon a letter from the twelfth battery on copperheads. They seem to labor under the delusion that copperheads in the battery were alluded to by this correspondent. This is an entire mistake. He speaks of the copperheads at home and intends no reference to any member of the battery. These correspondents are also wide of the mark in charging the authorship of the letter upon individuals detailed as clerks from the battery, and have done injustice in their remarks. We regret that any feeling should have been displayed in relation to this matter, through misapprehension. One of these correspondents, D. R. B., exhibits an undue amount of sensitiveness about his party; and as he is probably not aware of the changes in it since he left, he would do well to moderate his zeal, and deal less in denunciation. If we had not the best evidence that he is a brave and faithful soldier, we should classify him according to the tenor of his correspondence, but this would be unjust, as we believe him to be far more patriotic and sincere in his patriotism than the tone of his letters would sometimes indicate.

A lady in Pawtucket, R. I., was bitten on the arm a few weeks ago, by a black and white spider, and great ulcers, with much inflammation and pain are the result.

Editors Gazette.—All is well. Everything is working finely, and all feel confident. The enemy is completely invested within his entrenchments, and harassed night and day with shot and shell. Every hour diminishes their subsistence, and impresses the dire necessity of displaying the white flag. The health of the troops could not be better, and all are in fine spirits. They have the most unbounded confidence in the commanding general, and appreciate his strategy. I understand the programme to be, when all things are ready, which they will be in a very few days, to subject the enemy to a bombardment from all sides of 48 hours, and then to charge with infantry, when it is safe to say that some of us will get in.

Our company has lost one man killed, a German private, William Smith by name. He fell the evening of the 4th inst., while entering the city of Vicksburg, and was killed at Young's Point, of chronic diarrhoea, the 31st ult. He was a true patriot and a faithful soldier. His loss was much regretted by all.

I. H. S.

Co. F, 33d Reg't W. V.

Very Late from Vicksburg.

We are permitted to publish the following letter from John Wingate, of this city, clerk in the pay department, to his family. It is one day later from Vicksburg than any other news that has been published, and will be read with interest:

NEAR VICKSBURG, June 14, 1863.

This is a lovely morning—the sun is shining brightly, the air is balmy, and there is a good strong breeze. Last Friday we went up the Yazoo, and upon arrival at the landing nearest Gen. Grant's headquarters, received intelligence that Gen. Grant did not wish the troops paid off until after the fall of Vicksburg, so the paymaster who has charge of the company, concluded we all had better go back to Memphis that night. Major Bailey and myself were bound to see the army, and find the 12th battery before we left, as we knew not when we should return, if ever, so we endeavored to persuade the party to detain the boat over one day. They were opposed to it, said we could not get transportation, passes, &c. We told them that we believed we could; went on shore, and the first persons we met were Archy Glascock and Spencer Eldridge, who are now clerks in the quartermaster's department, but are soon to go back to the battery. We told them how the master stood on the boat. They said they could rig the major and myself out that night, and would go on board and promise to supply them in the morning. So they consented to remain, and we procured passes, mounted a mule, (for the first time,) and with Glascock for our escort, started for Gen. McPherson's headquarters. We rode from 5 o'clock until 10 before we found them, over a country such as I never saw before, up and down hills almost perpendicular, through valleys and ravines, with lights from the tentacles sometimes above and sometimes beneath us, and the booming of guns all around.

We found Henry Wright and Dorman Noggle clerks at the quarters, and started with them until morning, when we waited for the 12th battery. We soon found the captain's tent, met the Captain, Lieuts. Harlow and Amsden, Anderson, Dey and Fish, who appeared glad to see us I assure you. They flew around, got us breakfast, and then we all started for the 1st section. Just before arriving we met Henry going to water his horses; the moment he caught a glimpse of me he was off his horse and running to meet me. I think he was glad to see me; he is looking first rate, and feeling well. Cheeny shook my arm about 10. Saw Wheeler Bowen who is tough as a pitch knot, Tom Croft, and in fact all the boys. Cheeny gave us a specimen of his gunnery, which was highly satisfactory. He is considered about as good a gunner as they have in the service. He and Henry still keep together. Their tent is just behind their fortification, a little lower down, out of range, and they are very comfortable.

This whole army is in excellent condition, and have the best location in the whole country. How it was possible for them to drive the rebels out of their entrenchments is a mystery to me. The batteries are placed on the heights, while the tents, ammunition stores, &c., are on the side-hills and in caves and valleys. Some have tents formed by two rubber blankets, a great many by canvas which grow here in abundance, and some dig into the side-hills and make the hole their tent. The camps of tents made from cane brakes produce a very fanciful appearance, but I should think that even a tree would be better protection in rainy weather than they.

The foliage here is fine, the trees very large, and I should judge the soil was rich. Blackberries are just commencing to ripen, Henry and I picked a few, which tasted very good. Capt. Zichrich took us from his battery to the largest gun on the whole line, we stood near that gun a long time, watching nine inch shells as they left it until they struck and exploded, with rifle balls singing over our heads. I had my coat off, stepped upon the bank one foot over my head. The rebels reply but very little with artillery, but their sharpshooters are watching for every mark. Our men are within 50 yards of the rebel works, working up nearer every day.

We went back to captain's tent and got our dinner, and then started for Gen. Grant's headquarters. Before we got there had good bye to Henry the captain, Lieut. Harlow, and went on our way, expecting we should not see them again until the war is over, but we soon met one of our party who said Gen. Grant had changed his mind, and that we were to remain and pay the troops, so we rode back to the boat, where we arrived about 7 o'clock, having seen and passed through more than we ever expected to in our lifetime. They all speak well of Henry, and I think he is a

Very Late from Vicksburg.

We are permitted to publish the following letter from John Wingate, of this city, clerk in the pay department, to his family. It is one day later from Vicksburg than any other news that has been published, and will be read with interest:

NEAR VICKSBURG, June 14, 1863.

This is a lovely morning—the sun is shining brightly, the air is balmy, and there is a good strong breeze. Last Friday we went up the Yazoo, and upon arrival at the landing nearest Gen. Grant's headquarters, received intelligence that Gen. Grant did not wish the troops paid off until after the fall of Vicksburg, so the paymaster who has charge of the company, concluded we all had better go back to Memphis that night. Major Bailey and myself were bound to see the army, and find the 12th battery before we left, as we knew not when we should return, if ever, so we endeavored to persuade the party to detain the boat over one day. They were opposed to it, said we could not get transportation, passes, &c. We told them that we believed we could; went on shore, and the first persons we met were Archy Glascock and Spencer Eldridge, who are now clerks in the quartermaster's department, but are soon to go back to the battery. We told them how the master stood on the boat. They said they could rig the major and myself out that night, and would go on board and promise to supply them in the morning. So they consented to remain, and we procured passes, mounted a mule, (for the first time,) and with Glascock for our escort, started for Gen. McPherson's headquarters. We rode from 5 o'clock until 10 before we found them, over a country such as I never saw before, up and down hills almost perpendicular, through valleys and ravines, with lights from the tentacles sometimes above and sometimes beneath us, and the booming of guns all around.

We found Henry Wright and Dorman Noggle clerks at the quarters, and started with them until morning, when we waited for the 12th battery. We soon found the captain's tent, met the Captain, Lieuts. Harlow and Amsden, Anderson, Dey and Fish, who appeared glad to see us I assure you. They flew around, got us breakfast, and then we all started for the 1st section. Just before arriving we met Henry going to water his horses; the moment he caught a glimpse of me he was off his horse and running to meet me. I think he was glad to see me; he is looking first rate, and feeling well. Cheeny shook my arm about 10. Saw Wheeler Bowen who is tough as a pitch knot, Tom Croft, and in fact all the boys. Cheeny gave us a specimen of his gunnery, which was highly satisfactory. He is considered about as good a gunner as they have in the service. He and Henry still keep together. Their tent is just behind their fortification, a little lower down, out of range, and they are very comfortable.

This whole army is in excellent condition, and have the best location in the whole country. How it was possible for them to drive the rebels out of their entrenchments is a mystery to me. The batteries are placed on the heights, while the tents, ammunition stores, &c., are on the side-hills and in caves and valleys. Some have tents formed by two rubber blankets, a great many by canvas which grow here in abundance, and some dig into the side-hills and make the hole their tent. The camps of tents made from cane brakes produce a very fanciful appearance, but I should think that even a tree would be better protection in rainy weather than they.

The foliage here is fine, the trees very large, and I should judge the soil was rich. Blackberries are just commencing to ripen, Henry and I picked a few, which tasted very good. Capt. Zichrich took us from his battery to the largest gun on the whole line, we stood near that gun a long time, watching nine inch shells as they left it until they struck and exploded, with rifle balls singing over our heads. I had my coat off, stepped upon the bank one foot over my head. The rebels reply but very little with artillery, but their sharpshooters are watching for every mark. Our men are within 50 yards of the rebel works, working up nearer every day.

We went back to captain's tent and got our dinner, and then started for Gen. Grant's headquarters. Before we got there had good bye to Henry the captain, Lieut. Harlow, and went on our way, expecting we should not see them again until the war is over, but we soon met one of our party who said Gen. Grant had changed his mind, and that we were to remain and pay the troops, so we rode back to the boat, where we arrived about 7 o'clock, having seen and passed through more than we ever expected to in our lifetime. They all speak well of Henry, and I think he is a

Editors Gazette.—All is well. Everything is working finely, and all feel confident. The enemy is completely invested within his entrenchments, and harassed night and day with shot and shell. Every hour diminishes their subsistence, and impresses the dire necessity of displaying the white flag. The health of the troops could not be better, and all are in fine spirits. They have the most unbounded confidence in the commanding general, and appreciate his strategy. I understand the programme to be, when all things are ready, which they will be in a very few days, to subject the enemy to a bombardment from all sides of 48 hours, and then to charge with infantry, when it is safe to say that some of us will get in.

Our company has lost one man killed, a German private, William Smith by name. He fell the evening of the 4th inst., while entering the city of Vicksburg, and was killed at Young's Point, of chronic diarrhoea, the 31st ult. He was a true patriot and a faithful soldier. His loss was much regretted by all.

SOUTH FIRST STREET.

Applications for Grading, Paving Gutters and building sidewalks on South First Street, between Main and Jackson Streets in the third Ward.

BIDDING.—The road bed will be 30 feet in width between the paving of the gutters, and the center line will be 30 to 35 inches above the bottom of gutters. The road bed surface completed will be even and uniform in surface, raising regularly from the gutter to the center of the road. The grading will be estimated by the cubic yard in excavation, nothing being allowed for earth in embankment, grading, etc.

The estimated embankment will be taken, first, on the sides of the road and in such manner as

cutters and a grade for sidewalks.

secondly, from the excavation to be made of the road.

the haul does not exceed 500 feet it will be laid simply as earth in excavation, and bids are made for the cubic yard, for every 100 feet over

the material for the road bed is to be earth and clay or sand or gravel to be used.

thirdly, cutters are to be used on each side of said road to be six feet in width at the top and eight feet in depth at the lowest point.

the cutters are to be paved with good sound stone or gravel in width and depth to their edges, and on sand and gravel, and in such manner as to be curved channel for the water. The shape of the cutters is to be made to suit the shape of the stone, will be such as the alignment of said road direct. The paving will be estimated by the

preparing bids for the
laying stone, hauling and placing same.
WALKS.—The bids for the sidewalks, on each
side of the street, will be 12 feet wide, composed of
either granite or granite material, and will con-
sist, in grade, as now laid, of 12 courses of
said stone; the said walks are to be made
and even and ready for planking.

NOTES.—At this point the section
between the Wisconsin street and South
Division and Wisconsin streets with said South
street, there are to be stone crosswalks three feet
wide and composed of stone, not less than one foot
thick and not less than one foot high.

WORK.—The work to be done under the direction of the
City Engineer, and under the supervision of the
City Engineer, is as follows:—

Dated April 10th, 1883.
L. F. BARTON,
City Engineer.

ALDERMEN: J. D. Ward,
J. H. C. O'Connell,
J. H. C. O'Connell.

The specifications filed April 10th, 1883.
ANDREW BOES, Jr., City Clerk.

CIRCUIT COURT, ROCK COUNTY.
